The Editor has received a few picture cards  
from readers, and plans to feature more,  
especially those with some story attached to  
them. Send your submissions to the Editor.

This PC shows a fanciful artist's rendition of the landing of the remnants of the crew of the famous World War I German cruiser Emden near Hodeida in the Turkish province of Yemen. The story of the exploits of the Emden, its destruction in the eastern Indian Ocean by the HMS Sydney, and how a small landing party on Direction Island escaped and returned to Germany against all odds has been the subject of several books. Submitted by Carl Catherman
